SUMMARY

Senior Full Stack Engineer with 6 years delivering scalable TypeScript/React frontends and Node.js/PostgreSQL backends. Expert at building high-throughput systems and leading cross-functional engineering teams.

EXPERIENCE

Senior Software Engineer | TechCorp Inc. | San Francisco, CA | 2019–Present

Built scalable REST APIs with Node.js and Express, serving 50K+ daily active requests.
Led React TypeScript frontend migration, reducing page load time by 40%.
Deployed containerized microservices with Docker and managed high-availability PostgreSQL clusters.
Designed UI assets in Figma and collaborated with design teams.

Software Engineer | DataFlow Systems | New York, NY | 2017–2019

Developed Python data pipelines processing 1M records per day.
Built internal dashboards using React and D3.js.

EDUCATION

UC Berkeley | B.S. Computer Science | 2013–2017

SKILLS & TECHNOLOGIES

TypeScript, JavaScript, Python, React, Node.js, Express, Docker, PostgreSQL, Redis, Figma
